

## Cynthia - Capo 3

Intro:

C (with alternating bass)

Verse:

Em            F            C  
So you saw that fire in the sky  
Em            C  
Well I think that's so cool  
Em            F            C  
And I know that nothing'll change you  
          F            G  
You are nobody's fool

Chorus:

C   G            C    F  
Cynthia won't you take me to  
C            G  
Pyramid Lake with you  
          F            C            F            C  
We could watch the spaceships, maybe they'll take us on a trip  
F            Dm   F            G            C  
To that never ending sky, to that wild and endless night.

And you stood in their beam of light  
And they showed you the bones on the moon  
Well I hope I get to go there  
With you real soon

(chorus)

And we get there before the sun sets  
And we put up your tent  
Watch the stars dance all night  
And watch the sun come up (watch that sun coming up)
