

## CAPO 1

G C D G

I know you don't get back til tomorrow, but that's not soon enough  
The nights are cold and long without you, the days, just as cold and rough

I close my eyes I see you standing, all alone somewhere out there  
Wishing to have someone to talk to, wishing to have someone who cares

C D

**You've only been gone a couple of days**

Bm Em

**Since then I've counted out the ways**

C D G

**Though physically apart, you're deeply nestled in my heart**

C D B7 Em

**I'll be alright after tomorrow, when you're here with me**

C D G

**Counting out our lucky stars, that you've arrived safely.**

And now I look down at your pillow, imagine you are laying here  
With breath so soft and dreams so sweetly, making our distance disappear
